

S5 Table. Departure from Hardy-Weinberg Equilibrium test. Observed (H_O) and expected (H_E) heterozygosity as inferred for North, Central, and South Pakistan black francolins. The probability value for HWE test (P) was calculated for each locus. *: significant departure from HWE after application of Bonferroni correction ($\alpha' = 0.05$, $\alpha' = \alpha/8 = 0.006$). Mono., monomorphic locus.

Locus	North Pakistan		Central Pakistan		South Pakistan	
	H_O/H_E	P	H_O/H_E	P	H_O/H_E	P
